EXPERIENCE

Best Buy | Waterloo, ON

Oct 2025 - Jan 2026

Retail Sales Specialist - Smart Home, Health and Wearables

- Provided custom advice to clients about different technologies according to their requirements, and helped set up smart home equipment at their home or office.
- Helped create customer awareness of the different features of products and how to use them effectively to enable informed purchasing choices.
- Provided customer assistance by using your own expertise in both smart home and wearable technology to select the best product for the customer's home or personal needs.
- Helped other employees reach sales goals by working together as a team and offering quick, friendly service to customers in the store setting.

Pro Concrete | Oakville, ON

Apr 2026 - Aug 2026

Construction Labourer

- Supported residential and commercial construction operations, assisting with excavation, concrete preparation, pouring, and finishing.
- Operated heavy machinery and power tools safely, consistently following strict safety and operational protocols.
- Collaborated with a multi-person crew to meet deadlines while maintaining
- accuracy and efficiency under pressure.
- Strengthened attention to detail, endurance, and discipline through consistent on-site performance.

Oakville Futsal Club | Oakville, ON

May 2024 - Aug. 2024

Coach and Trainer

- Designed and led training sessions for children aged 6–10, fostering teamwork, focus, and discipline
- Operated and maintained a light-reactive smart wall system, performing setup, calibration, and reliability testing
- Integrated sensor-based performance data into training sessions to evaluate and enhance individual results
- Built leadership, communication, and decision-making skills in both coaching and refereeing roles

Loblaws Pharmacy | Oakville, ON

January 2024 - June 2024

Pharmacy assistant

- Operated pharmacy software systems, gaining familiarity with healthcare data management and security protocols.
- Practiced accurate data handling and confidentiality in compliance with privacy regulations.
- Developed interest and awareness in system reliability, cybersecurity, and technical integrity within healthcare operations.
- Ensured medication preparation and distribution met safety and accuracy standards.

PROJECTS

Hackathon Project – SU Golden Talks (Wilfrid Laurier University) | React, Javascript December 2026

- Developed a full-stack student platform using React, TypeScript, and Supabase in a 48-hour hackathon
- Built and connected frontend components to a backend database, gaining hands-on experience with full-stack development
- Designed and worked with a PostgreSQL database, strengthening understanding of data structures, queries, and storage
- Expanded knowledge of React, state management, and integrating APIs with a live application
- Implemented features such as blog posts, marketplace listings, messaging, and search functionality
- Collaborated in a team environment to rapidly design, build, and deliver a working application under time constraints

Password Strength Checker | Python, Project Sept 2026

- Developed a password strength checker by implementing complexity rules and weak pattern detection which in return resulted in stronger password recommendations and improved password security
- Tested different password patterns and edge cases improving the accuracy of the feedback system
- Added simple suggestions to help users strengthen passwords, resulting in easier and faster fixes for users
